

International education & training snapshot: Ipswich 2020

International student enrolments

International student enrolments

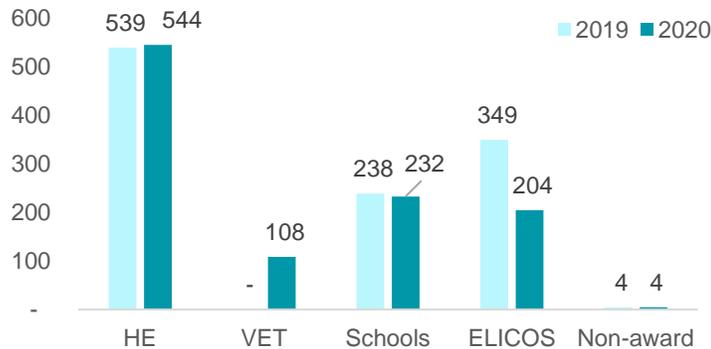

1,100
enrolments in 2020

In 2020, student enrolments in Ipswich (on student visas) totalled 1,100. **Higher education (HE)** remained the largest sub-sector, with 544 enrolments, followed by the schools and ELICOS sub-sectors. Enrolments in the VET sub-sector reached 108, increasing from zero enrolments in 2019.

-2.7%
decline in enrolments 2019 to 2020

The onset of COVID-19 and timing of Australia's border closures in 2020 disrupted a large cohort of international students who had departed the country or were intending to arrive for studies. It is likely that the impact of COVID-19 on enrolments (given cancellations and deferrals) will not be fully observed until 2021.

Chart 1: IET enrolments by sub-sector, 2020

Enrolments by source market

The largest source markets for international student enrolments in Ipswich were **India** and **Nepal**, which together accounted for **46% of total enrolments in 2020**.

Compared to the other regions in Queensland, Ipswich as a region attracts higher share of students from India, Nepal and China.

Four of Ipswich's top ten source markets recorded growth in IET enrolments in 2020. These were India (41%), Vietnam (5%), Saudi Arabia (6%) and South Korea (13%).

Table 2: Enrolments in top five source markets, 2019 to 2020

Country	2019		2020		Growth (share)	
	Enrolments	Share	Country	Enrolments		Share
Nepal	253	22%	India	279	24%	↑
China	244	22%	Nepal	250	22%	—
India	198	18%	China	198	17%	↓
Japan	96	9%	Japan	72	6%	↓
Hong Kong	68	6%	Hong Kong	60	5%	↓
Total	859	76%		859	74%	↓

74%

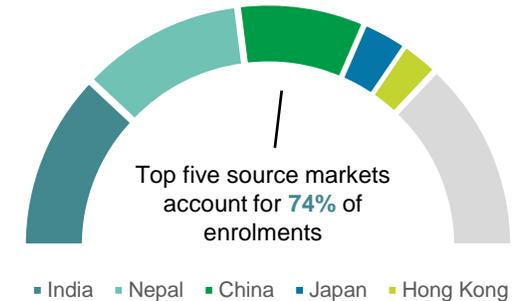

The share of total enrolments attributable to the top five source markets, higher than the Queensland total of 55%.

Source market concentration

Overall, Ipswich is the **second most concentrated IET sector in Queensland**, with a diversity index score of 1,444 in 2020*. From 2019 to 2020, Ipswich has become slightly more concentrated, with the diversity index increasing from 1,325 in 2019.

This is despite a slight decrease in concentration of enrolments in Ipswich's top five source markets (74%), relative to 2019 (76%).

The top five source markets accounted for **74%** of IET enrolments in Ipswich, compared to 55% for Queensland.

*Deloitte Access Economics measures the degree of enrolment source market concentration within a region by the Herfindahl-Hirschman index. This is defined as the sum of square of the source market shares of enrolments. The index can range from 0 to 10,000, with a low index suggesting that enrolments in the IET sector are spread over a diverse range of source markets. This can make the sector more resilient to shocks in the global market.

Regional concentration

Geographically, Ipswich accounted for **0.8% of IET enrolments in Queensland in 2020**.

Export revenue

\$52.5m
Export revenue in 2020

Total export revenue from international student expenditure on tuition fees and goods and services was **\$52.5 million in 2020**.

The HE sub-sector made the largest contribution to revenue in Ipswich, with \$33 million revenue for 2020, accounting for 64% of total IET export revenue in Ipswich.

-0.1%
decrease in export revenue from 2019 to 2020

Overall, export revenue decreased 0.1% from 2019 to 2020. Export revenue declined at a slower rate than enrolments in Ipswich in 2020.

Chart 3: Growth rate (%) of export revenue by IET sub-sector, 2019 to 2020

Regional breakdown

Ipswich is the seventh largest segment of the Queensland IET sector, attracting **1.1% of export revenue** in 2020. Export revenue decreased by **0.1%** in 2020.

Capacity of CRICOS providers

9%
Operating capacity of Ipswich institutions.

In 2020, there were approximately 18 CRICOS education providers in Ipswich with a total capacity of 12,662 CRICOS registered places.*

Ipswich’s educational institutions were operating at approximately 76% capacity in 2020.

Ipswich is operating at a lower capacity compared to other regions in the state, and lower than Queensland’s operating capacity of 60.4%. However, there exists capacity to facilitate further growth in the region.

*Deloitte Access Economics uses CRICOS registered places as a measure of capacity and student enrolments as a measure of demand. Data current as of 30 July 2021.

ELICOS students on non-student visas

Non-student visas

In addition to international students on student visas, 136 international students on non-student visas (NSV) also chose to study in Ipswich in 2020*.

Economic contribution of the IET sector

Direct economic contribution

The IET sector directly contributed **\$27.2 million** to the Ipswich economy and supported **177 full-time equivalent (FTE)** jobs in 2020 (Table 1).

This represents the value of economic activity associated with businesses that directly supply goods and services to international students and their visitors.

Table 1: Direct economic contribution of the IET sector, 2020

	Value added (\$m)	Employment (FTE)
Student visa students	26.9	175
NSV ELICOS	0.19	1
VFRs	0.03	0
IET sector	27.2	177

Source: Deloitte Access Economics estimates.

Indirect economic contribution

The IET sector also indirectly contributed **\$11.1 million** and **70 jobs (FTE)** to Ipswich in 2020. This represents the flow-on effects for industries that supply goods and services to the IET sector. This includes the maintenance services supplied to training providers, and the agricultural producers that restaurants source their food from.

Table 2: Indirect economic contribution of the IET sector, 2020

	Value added (\$m)	Employment (FTE)
Student visa students	11.01	69
NSV ELICOS	0.11	1
VFRs	0.03	0
IET sector	11.14	70

Source: Deloitte Access Economics estimates.

Total economic contribution

\$38.3m

Value added to the Ipswich economy by the IET sector in 2020

In total, the IET sector contributed **\$38.3 million** and supported **247 full-time equivalent (FTE) jobs** in the Ipswich regional economy in 2020. This represents a decline of **1.2%** in total value added contribution, and **7.6%** in employment from 2019.

Table 3: Growth in economic contribution of the IET sector, 2018 to 2020

	2018 to 2019	2019 to 2020
Value added	34%	-1.2%
Employment (FTE)	30%	-7.6%

Source: Deloitte Access Economics estimates; Australian Bureau of Statistics.

Key industries

The most significant industries supporting the IET sector in Ipswich are **education and training** (38%), **cafes, restaurants and takeaway food services** (8%), and **retail trade** (7%). Together, they comprised of 53% of Ipswich export revenue from the IET sector.

Table 4: Employment breakdown by IET industry (economic contribution), 2020

Industry	Employment (FTE)
Accommodation	5
Cafes, restaurants and takeaway food services	19
Clubs, pubs, taverns and bars	8
Rail transport	1
Road transport and transport equipment rental	5
Air, water and other transport	1
Travel agency and tour operator services	-
Cultural services	1
Casinos and other gambling services	0
Other sports and recreation services	2
Retail trade	16
Education and training	93
All other industries	96

Frequently Asked Questions

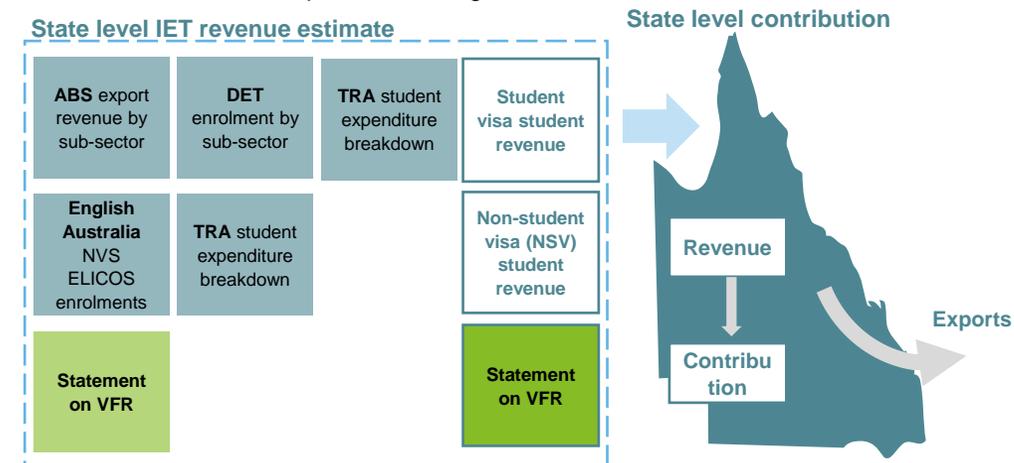

Methodology

Trade and Investment Queensland has worked with Deloitte Access Economics to produce consistent and comparable regional estimates of the contribution of IET to Queensland and its regions. The analysis has been informed by publicly available enrolment and expenditure data from the Department of Education, Skills and Employment (DESE), the Australian Bureau of Statistics (ABS), and Tourism Research Australia (TRA).

The ABS accounts for the impact of COVID-19 on IET export revenue by: (1) capturing the course fee of students studying offshore through 'correspondence courses' rather than 'education-related personal travel', (2) reflecting lower expenditure resultant from any students that have deferred their enrolments, and (3) reflecting any potential changes in students' expenditure on goods and services by using the latest TRA data on student expenditure.

The analysis focuses on the export revenue and economic activity associated with (1) onshore international students in Queensland, and (2) the additional cross-border delivery of international education to students offshore as a result of COVID-19 border closures. There is a high degree of uncertainty over the export revenue associated with cross-border IET due to limited publicly available information. Consequently, a simplifying assumption based on higher education enrolments has been applied in determining their distribution in its regions.

The economic contribution is estimated by incorporating Deloitte Access Economics' integrated regional input-output model (DAE-IRIOM) with the Tourism Satellite Accounting framework, which is the internationally approved approach for measuring the economic contribution of tourism exports, including IET.

Using the results

For consistency in reporting, value added and employment (rather than export revenue) are the correct metrics to use in measuring the significance of the IET sector to a region. While it is appropriate to refer to the *total* value added and employment when referring to the overall size or contribution of the IET sector in a particular region, only the *direct* value added and employment figures should be used when comparing the IET sector against other industries within the same region.

Glossary

Contribution

<i>Direct contribution</i>	The contribution generated by direct transactions between the international student and the producer of goods and services. This includes their education fees, as well as living expenses.
<i>Indirect contribution</i>	The subsequent flow-on effects created by the requirement for inputs from those industries supplying goods and services to IET. For example, this might include the fresh produce supplied to supermarkets visited by students.
<i>Total contribution</i>	The sum of the direct and indirect contributions from IET.

Export revenue

The sales revenue received by the IET sector in providing goods and services to international students.

Value added

A measure of the sector's return on its capital and labour. It is the indication of the sector's value and contribution to the regional economy. Export revenue and value added should not be summed.

Visiting friends and relatives (VFR)

Visitors who specifically indicate in the International Visitor Survey that they are visiting Queensland for the purpose of visiting an international student studying in Queensland.

Non-student visa (NSV)

Refers to international students studying in Queensland who do not hold student visas, and can include students in ELICOS courses and on study tours. This analysis only quantifies the contribution of NSV ELICOS students.

Disclaimer

These are Deloitte Access Economics' estimates for international student enrolments and contribution based on the best available data. The results do not include the contribution to Queensland from international students studying elsewhere in Australia (e.g. through tourism).
